

# MCB USD BOND FUND

## KEY INVESTOR INFORMATION DOCUMENT

This document contains key investor information about the MCB USD Bond Fund (the “**Sub-Fund**”) and its current class of units in issue, namely the “**Retail Accumulation Class**”. It is provided with informational purpose only and does not constitute marketing material. The information is intended to help you understand the nature and the risks of investing in this Sub-Fund. You are advised to read this document carefully to make an informed decision about whether to invest.

## MCB USD BOND FUND

The Sub-Fund is a USD denominated sub-fund of MCB Unit Trust (the "Fund") with ISIN: MU0650S00087; Citi Code: K2KA; Bloomberg Code: MCBBCF0: MP. The Fund, together with the Sub-Fund, are managed by MCB Investment Management Co. Ltd (the "Fund Manager"), holder of a CIS Manager licence issued by the Financial Services Commission. The Sub-Fund consists currently of one class of units, i.e. the Retail Accumulation Class.

### Objectives and Investment Policy

- ❖ The Sub-Fund Fund focuses on generating a return for investors from coupon income, capital appreciation and currency appreciation through investment in interest bearing securities.
- ❖ The Sub-Fund adopts an active management approach within a medium risk strategy whereby exposure to bond and currency markets will be routinely monitored and assessed as new information arises to ensure that the portfolio is structured in line with the investment Manager's views.
- ❖ Units can be bought and sold once a week on every Friday. Proceeds of repurchases/redemptions are usually paid to unit holders, subject to the terms of the Fund's documentation, within 10 business days after the processing date.
- ❖ The Sub-Fund does not pay out any dividends as it automatically reinvests all net income.
- ❖ The Manager and the trustee may decide from time to time to distribute net realised capital gains to unit holders, either by way of cash distributions or 'bonus units'.
- ❖ The Sub-Fund is actively managed with the Fund Manager applying fundamental analysis in order to pick securities in a selective and discretionary manner.
- ❖ The units are denominated in USD, the Sub-Fund's base currency.
- ❖ The Sub-Fund's returns depend on the performance of its underlying investments and it does not provide protection against investment losses caused by financial markets.
- ❖ This Sub-Fund may not be appropriate for investors who plan to redeem their units within 3 years.

The Fund's prospectus, the annual report, the quarterly reports and the Sub-Fund's factsheet and daily net asset value, are available on the Fund's website: <https://mcbcapitalmarkets.mu/investment-products/mutual-funds/mcb-usd-bond-fund>

## Risk and Reward Profile

The risk category 3 reflects a potentially medium gain and/or loss in the value of the portfolio. This is due to investments principally in treasury bonds, institutions and corporation in both developed and emerging countries with a Fitch and S&P rating of at least BBB- or a Moody's rating of at least Baa3.

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Sub-Fund. The actual risk profile can vary significantly if you sell at an early stage and you may receive a lower amount than your initial investment.

The risk category associated with this Sub-Fund can evolve over time based on market conditions. The lowest risk category does not mean "risk free".

Your investment is not guaranteed. The summary risk indicator is a guide to the level of risk of this product. It shows how likely it is that the product may lose money because of movements in the markets.

### Significant risk(s) for the Sub-Fund include, but is not limited to:

- ❖ **Interest rate risk:** A substantial part of the Sub-Fund is invested in bonds, the values of which usually rise or fall in response to interest rates. Changes in debt instruments' value, though not affecting the interest income paid to the Sub-Fund, may affect the capital value of the Sub-Fund's units.
- ❖ **Currency risk:** Investments are made in bonds which are denominated in currencies other than the base currency of the Sub-Fund (USD), and thus movements in exchange rates may cause the value of the investment to fall. The Sub-Fund's proposed currency universe and mix are as follows: AUD, USD, EUR, GBP, NZD, CAD, JPY, NOK, CHF and BRL.

A complete description of risk factors can be found in the risk section of the Fund's prospectus.
